PROFESSIONAL SUMMARY

Frontend Engineer with **5+ years of web development experience**, including **4+ years building production React.js and Next.js applications** — from real-time trading platforms and enterprise dashboards to AI-driven tools. Since **April 2026**, integrates **Claude Code** into a daily AI-augmented development workflow, directing agentic pair-programming for scaffolding, refactors, and tests while owning every architecture and code-quality decision. Delivers production-grade features within fully remote, cross-functional Agile teams.

TECHNICAL SKILLS

Frontend Development: React.js, Next.js, JavaScript (ES6+), TypeScript, React Hooks, Context API, Performance Optimization (Code Splitting, Lazy Loading, Web Vitals)

UI & Styling: Tailwind CSS, Styled-Components, Material UI, Bootstrap, Framer Motion, Responsive Design

State & Forms: Redux, Redux Toolkit, React Hook Form, Zod (schema validation)

AI-Augmented Development: Claude Code, AI Pair Programming, Prompt Engineering, Agentic Dev Workflows, AI Code Review

Backend & APIs (working knowledge): Node.js, Express.js, RESTful APIs, Axios

Tools & Workflow: Git, GitHub, CI/CD Pipelines, Webpack, Vite, ESLint, Agile / Scrum

PROFESSIONAL EXPERIENCE

Frontend Developer / Engineer

May 2022 – Present

Revise — Mumbai, India (Remote)

- Design and develop complex, reusable React components for enterprise-scale applications, including real-time trading platforms and analytical dashboards with advanced data visualization.
- Built a Next.js AI-driven application enabling natural-language queries over books and IPC (Indian Penal Code) section content.
- Lead architecture of a mobile app that turns a local machine into a virtual dev environment — enabling full developer workflows, including AI-assisted code changes and agent-driven task execution, from mobile.
- Drive frontend architecture decisions and REST API integration with backend teams; improved performance via memoization and reduced bundle size. Mentor junior developers and run code reviews — shipped multiple production releases with zero critical defects.

Software Developer

Oct 2020 – Jan 2022

Chools Consultancy Services — Bengaluru, India (Onsite)

- Built and maintained WordPress-based LMS websites — course delivery, learner progress tracking, and administrative management.
- Customized WordPress themes and plugins to client-specific e-learning requirements.
- Delivered responsive, cross-browser static sites in pure HTML/CSS/JavaScript, translating client wireframes into polished, production pages.

PROJECTS

Web3 Trading Dashboard — *React.js, Web3.js, Ethers.js, MetaMask, REST APIs*. Built a MetaMask-integrated dashboard for wallet authentication, transaction signing, and real-time trade execution, with secure network-switching and gas-fee handling.

API Key Management Dashboard — *React.js, REST APIs, Axios*. Built a full-CRUD API key management tool with role-based access control, real-time usage metrics, and robust client-side validation.

Business Portfolio & Admin Dashboard — *React.js, Responsive Design*. Delivered a fully responsive portfolio and admin dashboard for a photography studio client, with optimized images and load performance across devices.

EDUCATION

Bachelor of Engineering — Electronics and Communication Engineering

Visvesvaraya Technological University, 2019 · CGPA: 6.0 / 10
