Portfolio | **LinkedIn** | **GitHub**

PROFESSIONAL SUMMARY

Senior Frontend Engineer with **5+ years of experience** (**4+ years at Revise**) building production web and mobile products with React, Next.js and TypeScript — from **real-time trading and streaming AI interfaces** to **learning platforms and business websites**. Owns features end to end, from architecture and API contracts to polished UI, and ships fast, maintainable code. Uses AI-assisted development (Claude Code) to deliver faster while reviewing every change. Open to on-site, hybrid and remote roles.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Styling & UI: Tailwind CSS, Styled-Components, Framer Motion, Responsive Design

State & Data: Redux Toolkit, React Query, Context API, React Hook Form, Zod, REST APIs, WebSockets, Server-Sent Events

Performance: Code Splitting, Lazy Loading, Memoization, Bundle Optimization, Core Web Vitals

Tooling & Deployment: Git & GitHub, Vite, Webpack, npm, Vercel

AI-Assisted Development: Claude Code, Agentic Workflows, AI Code Review, Prompt Engineering

Testing (beginner): Vitest, React Testing Library

Backend (beginner): Node.js, Express.js

PROFESSIONAL EXPERIENCE

Frontend Engineer
May 2022 – Present

Revise — Mumbai, India (Remote)

- Grass: Code Agent Computer (live on the App Store) — Built the app for running and steering Claude Code and OpenCode sessions from a phone: resumable streaming chat that survives backgrounding and dropped networks, a tool-approval queue with push notifications, and one-tap switching between machines. First project built with AI-assisted development (Claude Code).
- 10X Trade — Built the trading interface for leveraged crypto futures in a Telegram Mini App: live WebSocket market data driving real-time profit-and-loss and charts, with orders signed on the user's device.
- TaxAI (launched on Product Hunt) — Built the research interface for chartered accountants: answers stream in beside the source Act, and each citation jumps to and highlights the exact section or proviso.
- Convo (launched on Product Hunt) — Built the developer dashboard for an LLM-memory SDK: magic-link sign-in, an infinite-scroll thread explorer and API key management.
- Own frontend architecture and API contracts with backend engineers, and review code across the team.

Software Developer
Oct 2020 – Jan 2022

Chools Consultancy Services — Bengaluru, India (Onsite)

- Built and maintained chools.in, the company's WordPress learning and consulting platform — course catalog, programme pages, learner accounts and course checkout.
- Customised WordPress themes and plugins for client-specific e-learning requirements.
- Delivered responsive, cross-browser websites in HTML, CSS and JavaScript from client wireframes.

SELECTED PROJECTS

Resume Builder — *Next.js, React, Tailwind CSS, Firebase, Zustand.* Built solo, end to end: 50+ ATS-friendly templates, live preview, AI writing help, PDF export and autosave.

URL Shortener — *React, Node.js, Express, REST API.* Built solo, end to end: React frontend, Node.js/Express API and database, with searchable link history.

Bilingual Registration Form (client) — *React, Google Drive API, jsPDF.* Built solo for a client, requirements to launch: English/Kannada intake form with PDF/image export and Google Drive saving.

EDUCATION

Bachelor of Engineering — Electronics and Communication Engineering

Visvesvaraya Technological University, 2019 · CGPA: 6.0 / 10
